Casino Experience

- Each Game becomes an ATM
- Track Uncarded Player Actions
- Increased time on Games
- Less hassle and liability then traditional ATMs
- Real-time Access to Players via App Notifications and Messaging
- No Modification to Existing Slot Accounting System rRquired

How It Works

Our Passive SAS Passthrough (PSP) technology to pass data on to the game without interfacing with the Casino's SAS (Slot Accounting System) server and provide direct credit to game transactions via the CASINO CASH APP and cloud servers. No need to modify or change any slot machine or slot

accounting system settings. Connecting with a single cable to the SAS data port to each game allows for fast and hassle-free installation our Casino Cash App environment. No need to modify your casinos' existing Slot Accounting System or game floor.
